

Mac Training

MAC REASONS: Introduction to Mac OS X, learn to customise and operate your Mac.

Switching to a Mac? This is a great place to start. In this workshop, we'll familiarize you with the Mac operating system and show you how to accomplish on a Mac what you used to do on a Windows PC. We'll also dispel common myths, show you how Windows applications like Microsoft Excel and Word work on a Mac, and answer any questions you may have

iLIFE: Introduction to the iLife Suite, learn to enhance and manage your digital life with your Mac.

Come to the iLife '09 workshop and discover how much you can do with our impressive collection of digital lifestyle applications. You'll see how easy it is to organize and edit photos in iPhoto, create amazing home movies with iMovie, learn how to play and record your own music in GarageBand, and share all of your creativity with friends and family on websites you design and publish with iWeb and the MobileMe Gallery.

MAC@WORK: Introduction to the iWork Suite, learn to be empowered at work with iWork.

Whether you're at home, school, or the office, iWork '09 makes it easy to create and share impressive documents, spreadsheets, and presentations on your Mac. In this workshop, you'll learn how to use the advanced tools in Pages '09 for writing and page layout. New features in Numbers '09 make it even easier to create formulas and stunning one-click charts. And we'll show you how to use the new cinematic animations, transitions, and effects in Keynote '09.
