

Numbers

for Mac Training: Beginners to Intermediate

For people who have a basic understanding of the macOS.

Duration: 4 hours
Price: R1 550 incl. VAT

Overview:

Numbers is Apple's spreadsheet application for Mac and iOS devices. Unlike traditional spreadsheet tools, Numbers is built around a table-centric design that seamlessly integrates charts, images & text into a flexible & visually engaging workspace. This session will get you started with the essentials - and by the end, you'll be confident in creating, editing, and presenting professional spreadsheets across your Apple devices.

Understanding the interface:

- Understanding menus, shortcut keys and toolbars
- Accessing and uses of the sidebar
- Select different document views
- Navigating documents and windows.
- Working with the infinite canvas

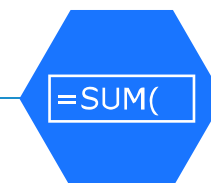

File management:

- Creating/saving/opening files
- Setting file properties
- Creating & managing templates
- Working over multiple versions

Working with cells and cell-data:

- Functions in choosing cells
- Copy & pasting cell data
- Using Autofill
- Inserting symbols and special characters
