

Keynote Training

The application layout has gone through a few changes which unifies the layout with the iOS and iCloud Platform. This presentation package is beyond powerful. Learn how to use existing templates or create your own. The world is your oyster; change colours, insert any media and media browser, apply slide and object transitions, animate, use different views and get a thorough overview of the complete package.

Prerequisite: Candidate must have a basic understanding of the Mac OS X.

Duration: 3 Hours
