

Pages Training

The application layout has gone through a few changes, which unifies the layout of the iOS and iCloud platform. Apple's answer to streamlined word processing, easy to use and dynamic in what it produces. Create and edit all your documents, reports, letters, brochures, invitations etc. Learn how to use tabs and rulers, create headers and footers, and collaborate transparently with tracking for version control and comment.

Prerequisites: Candidate must have a basic understanding of the Mac OS X.
